

HAFU ATELIER

HAFSA NOREEN PHOTOGRAPHY

The Complete Digital Blueprint - Version 4 (Haffu Edition)

Studio: 3404 Millicent Avenue, Oakville, ON L6H 0Z3 | +1-647-909-3135

Territory: Milton, Burlington, Oakville, Halton, GTA West, Niagara, Muskoka

Tagline: Capturing the laughter, tenderness, and fleeting beauty of life like scenes from your favourite film.

Philosophy: Art is not what you see, but what you make others see. - Edgar Degas

Palette: Ivory #F7F3EE, Charcoal #2B2724, Brass #A98052, Sage #9CAF9A, Dusty Rose #D8B4B4

Typography: Cormorant Garamond (headings), Lato (body)

1. HAFFU - The AI Studio Manager

HAFFU is Hafsa's personal AI assistant. She greets visitors, answers questions, checks availability, books sessions, sends contracts, collects retainers, and notifies Hafsa only when a booking is confirmed. The underlying model name never appears in frontend code - all user-facing text is sanitized to Haffu.

1.1 Operational Modes (Mode Manager)

- Atelier Executive - founder-led flagship posture; Haffu triages and protects creative hours.
- Client Sanctuary - white-glove care for booked clients; galleries, deliveries, rebooks.
- Vendor Portal - venue and planner collaboration with twice-daily batch dispatch.
- Archival Lab - deep-work protection for culling, retouching and album assembly.
- Emergency Maintenance - recovery posture; auto-booking runs, urgent flags batch daily at 19:00 ET.

A guarded state machine governs transitions: forbidden edges are rejected, minimum dwell windows apply, leaving Emergency Maintenance requires founder approval, and every transition lands in a ten-typed audit ledger.

1.2 Client-Facing

- Greets in under 3 seconds with session-type quick replies.
- Personalized gallery recommendations and pricing, timeline and location FAQs.
- Books discovery calls, then contract, retainer, confirmation.

1.3 Founder-Facing

- Lead triage with budget scoring; pricing advisor with 80%-sold alerts.
- Drafts vendor emails and blog captions; tracks invoices, retainers, HST summaries.

2. Website Architecture (21 Pages)

Static HTML/CSS/JS with a Three.js WebGL logo hero. Fully responsive from 360 px mobile through 768 px tablet to 1600 px+ desktop, with a hamburger drawer, sticky CTAs, and fluid clamp() typography. Deployable to Vercel and Cloud Run.

2.1 Public Endpoints

/ (home), /about, /weddings, /families, /maternity, /events, /booking, /portfolio, /packages, /reviews, /faq, /contact, /story, /service-areas, /oakville-photographer, /burlington-photographer, /halton-photographer, /client-portal, /privacy, /terms, /404, /sitemap.xml, /robots.txt.

2.2 SEO

- JSON-LD: LocalBusiness, FAQPage, AggregateRating on every landing page.
- Four town landing pages of 400+ words; OG and Twitter cards; canonical URLs; sitemap.xml; robots.txt.

3. Packages (CAD + HST)

- Portrait - 90 minutes, 1 location, 25 frames - from \$450.
- Family & Maternity - 2 hours, home or park, 40 frames - from \$650.
- Event - 4 hours, 200+ frames - from \$1,200.
- Wedding - 8 hours, 400+ frames - from \$3,800.
- Signature - full day, 800+ frames, reel - from \$6,500.

Add-ons: reel \$400, album \$600+, extra hour \$250, destination by quote. 13% Ontario HST applies (CRA #782910482RT0001).

4. The Automated Journey

Visitor lands - Haffu greets - intent profiled - availability checked - booking confirmed
- contract sent - retainer collected (Stripe) - calendar blocked - pre-shoot kit
delivered - the shoot - sneak peek within 48 hours - gallery in 3-4 weeks - print store -
review request - anniversary rebook.

5. Tool Engine Suite (30 HAFFU Auto-Service Tools)

Every tool compiles to 1,000+ production lines from versioned submodules, carries a twelve-point self-diagnostic, boundary tests, and a fifty-item batch simulation. Headline engines:

- Mini Session Filler - seasonal pop-up catalog, slot scheduler, HST ledger, VIP launch runbooks (1,033 lines).
- Preset Seller - Lightroom desktop/mobile presets, XMP/DNG packaging, camera calibration, instant licensing (1,107 lines).
- Background Remover - studio matting, high-key cutouts, backdrop replacement, 300 DPI print preflight (1,102 lines).
- Mode Manager - five operational modes, guarded state machine, SLA charter and weekly reviews (1,022 lines).
- Plus: contract generator, smart upsell, gallery arranger, wall-art visualizer, vendor matchmaker, seasonal predictor, and 21 more.

6. Tech Stack

- Frontend: HTML5, CSS3, vanilla JS, Three.js, GSAP, Lenis.
- Backend: Node.js, Express; AI: Vertex AI; Database: Firestore; Payments: Stripe.
- Calendar: Google Calendar API; Email: Resend; Hosting: Vercel + Cloud Run; Tests: Jest.

7. KPIs

- Under 60 seconds first response; 35% lead-to-booking.
- 20 weddings per year; 60% album attach; 40% automated revenue by 2027.
- 3-4 week delivery; 5-star Google rating; 40% repeat clients.

8. Verification & Deployment Protocol

- Phase A - full syntax sweep of src/ and scripts/, tool diagnostics, live server boot, 20+ endpoint 200-OK sweep, checkout and booking validation.
- Phase B - responsive audit: desktop (>1024 px, >1600 px), tablet (768-1024 px), mobile (<768 px, <480 px): hamburger drawer, stacked cards, sticky CTA, clamp() scaling, touch targets.
- Phase C - git commit with detailed message, then push origin main to github.com/waliahmad-blip/hafsanoreen.

The studio is in Haffu's hands. The blueprint is complete.
